3	Scroll to load data	1. Keep scrolling down the webpage	Data should keep loading till the last hospital on the application	Data kept loading till the last hospital on application was visible	Pass

1. Inroduction

Updates:
There will be an additional functional requirement.

2. Purpose

To test the new functionality by using selenium framework.

3.Test Strategy

A new Functional Requirement to perform Regression Testing:
The application will be tested to identify hospitals which have "Online Booking" facility.

4. Features to be tested

The "Online Booking" filter checkbox on the application.

5. Resourse Requirements

Hardware:	Laptop
Software:	Windows OS

6. Test Cases (One test case in each browser module)

To check whether the "Online Booking" filter is functioning and the application loads new results based on the given condition.

7. Assumptions

Many people find it faster and easier to book appointment online. Hence, the application can be tested to identify hospitals which have "Online Booking" facility.

8. Tools

Eclipse, Chrome, MicrosoftEdge

Functional Requirement No.	Function Requirement Description
FR0	It should be compatible for multiple browsers.
FR1	User should be able to access the website.
FR2	User should be able to search Hospital near him
FR3	User should be able to apply filters
FR4	Hospitals with rating more than 3.5 should be displayed
FR5	User can be able to access Diagnostics page and get top cities
FR6	User should be able to access Corporate Wellness form and enter his details.

COMMON FLOOR APPLICATION
